What will you actually keep?

Actual app capture. Fictional fund and sale; real saved outside research.

CLICK / SHOW

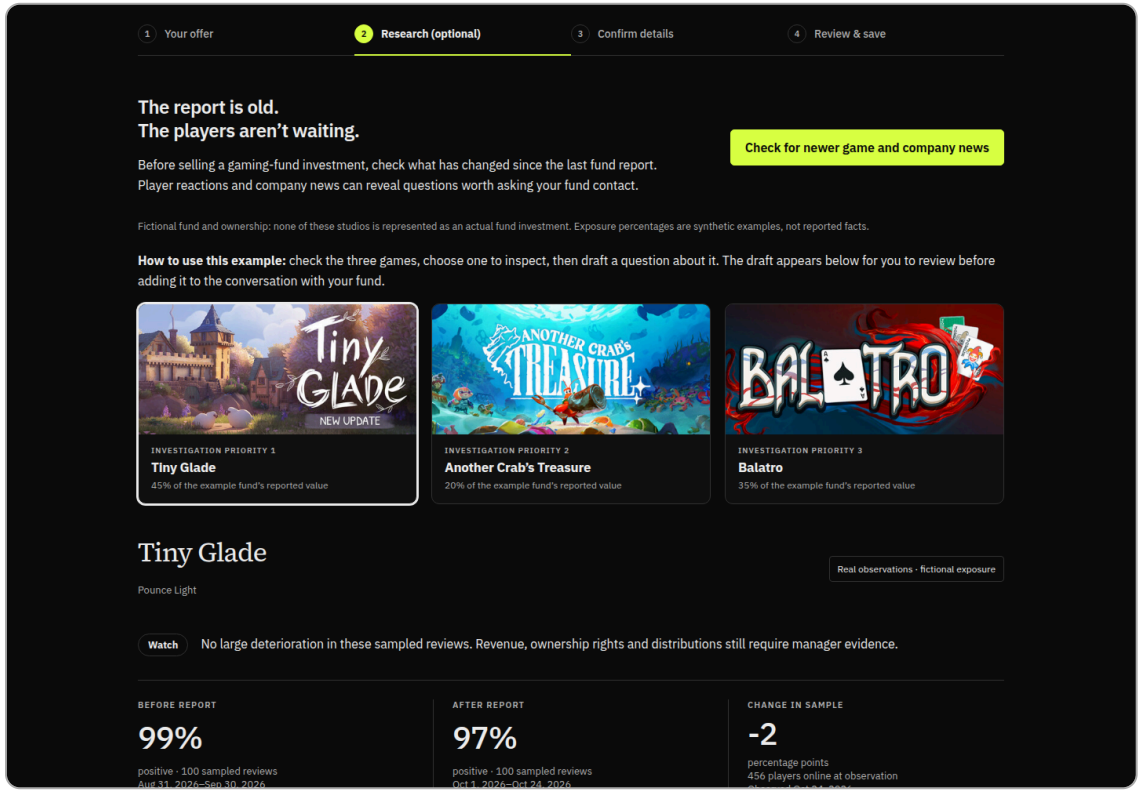

Start on Your offer. Point to the $700,000 purchase payment.

SAY

Imagine you invested in a fund that backs video game companies. Someone offers you $700,000 to buy your share. Before you say yes, you need to know what you're giving up, including any money the fund is about to pay you.

Second Look helps you work that out. This fund and these dollar amounts are fictional, so we can show you the whole process.

0:30–1:00 Ask a better question

Actual app capture. Fictional fund and sale; real saved outside research.

CLICK / SHOW

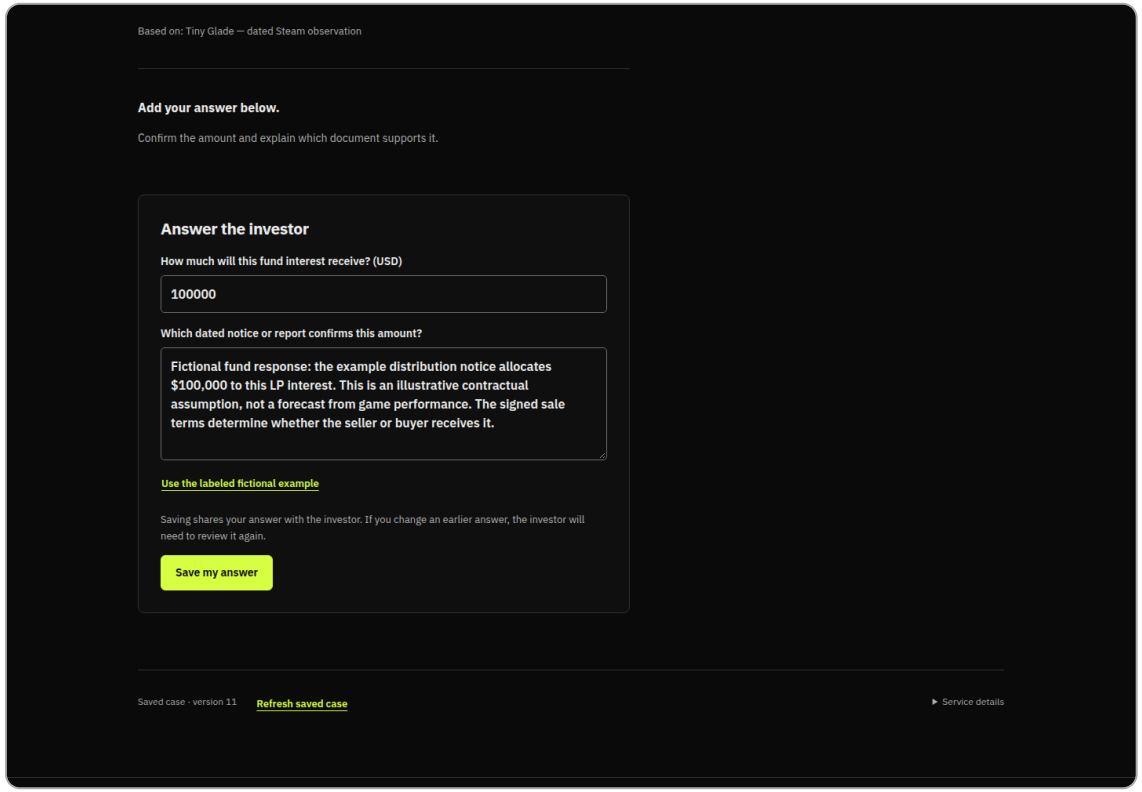

Click Research (optional). Show Tiny Glade, its player-review numbers and the company information. Click Draft a question about this game. Scroll down and click Use this question.

SAY

We started with gaming because it's a world I know. A fund report might be weeks old, but players are still reviewing the games and companies are still making news.

These are real findings we saved earlier. They help us ask the fund better questions, but they don't tell us what money we're entitled to receive. For that, we need an answer from the fund.

1:00–1:30 Get the missing answer

Actual app capture. Fictional fund and sale; real saved outside research.

CLICK / SHOW

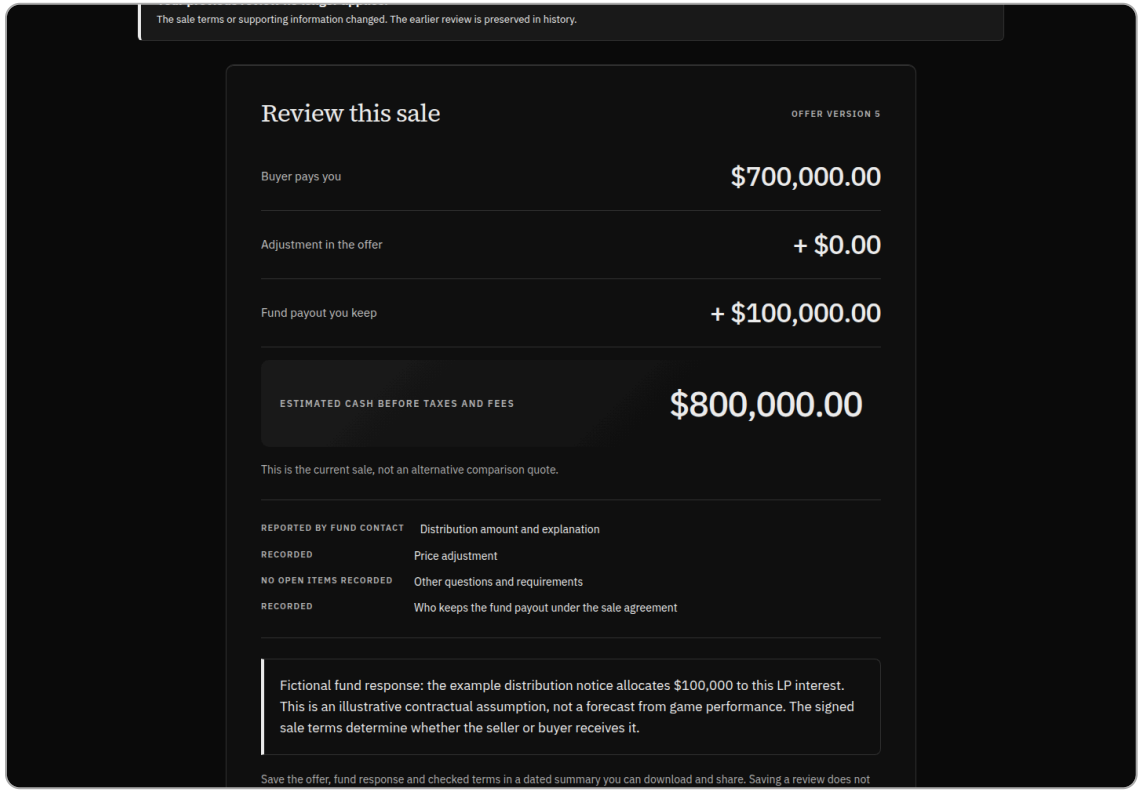

Click Try answering as the fund contact. Scroll to Use the labeled fictional example and click it. Click Save my answer.

SAY

Here I’m showing the person at the fund answering our question. In this example, they confirm that our share is due a $100,000 payout.

Their answer stays with the question, so the investor can see what was said and use it when reviewing the offer.

1:30–1:55 See the complete amount

CLICK / SHOW

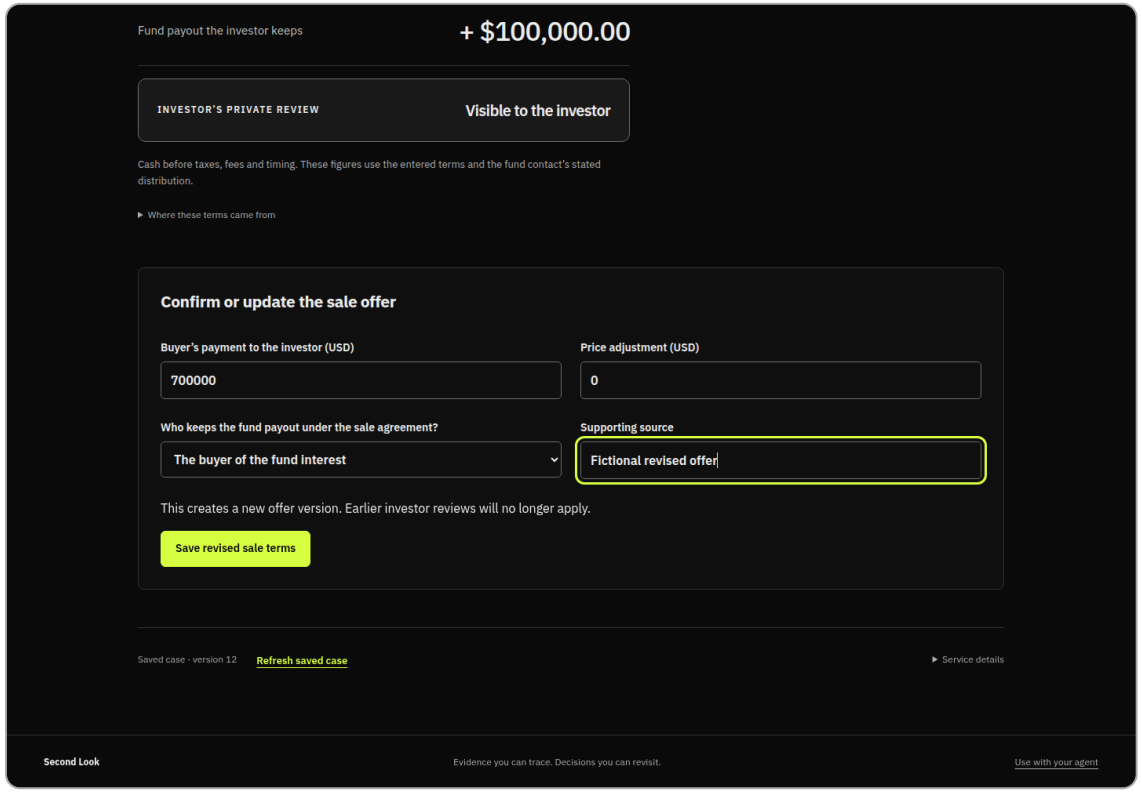

Scroll up and click See the investor’s updated total. Point to $800,000. Scroll down and click Save this review.

SAY

Back on the investor’s side, we can now see the full picture. The buyer pays $700,000, and the current terms let us keep the $100,000 fund payout. That’s $800,000 before taxes and fees.

I’ll save this review so we have a record of exactly which terms we checked.

One term changes

Actual app capture. Fictional fund and sale; real saved outside research.

CLICK / SHOW

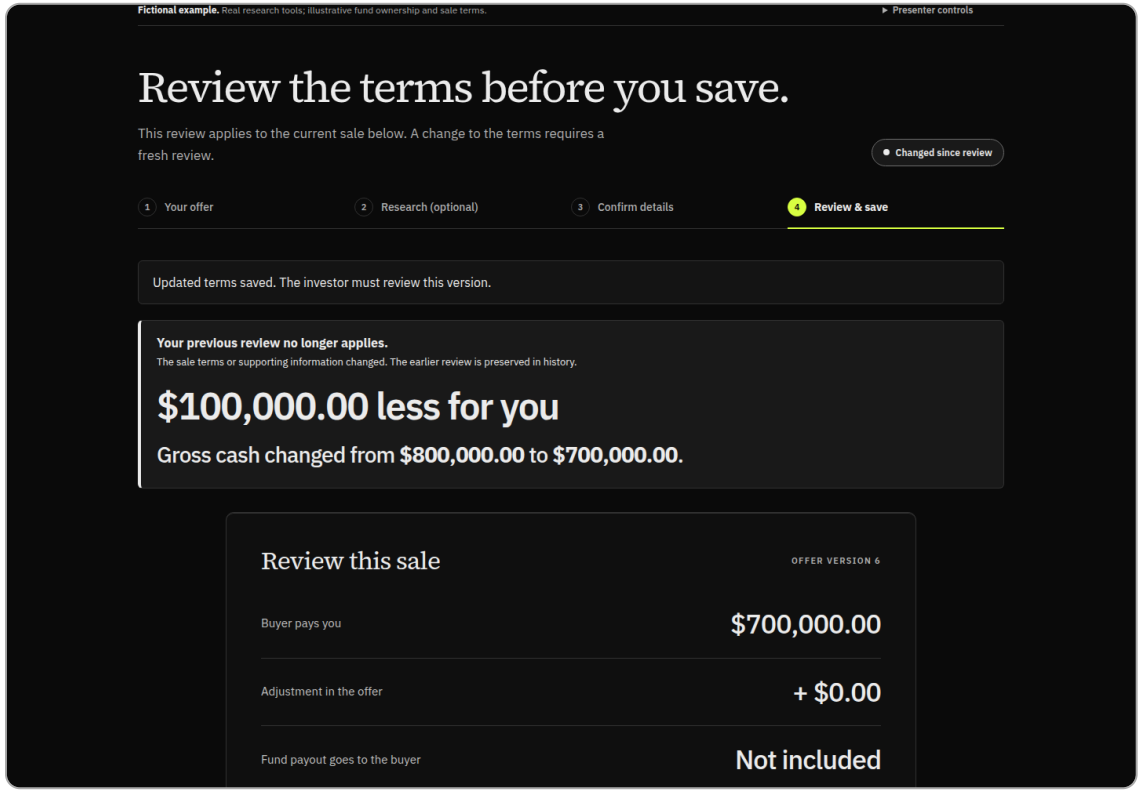

Click Try changing the buyer's terms. Under Who keeps the fund payout under the sale agreement?, choose The buyer of the fund interest. In Supporting source, type Fictional revised offer. Click Save revised sale terms. Scroll up and click See the investor's updated total.

SAY

Now the buyer changes one detail. They still offer $700,000, but the revised agreement says they get the fund payout.

The headline price looks exactly the same. Let's see what that change actually means for us.

2:25–3:00 $100,000 less for you

Actual app capture. Fictional fund and sale; real saved outside research.

CLICK / SHOW

Point to $100,000.00 less for you and Your previous review no longer applies. Pause for the audience to read. Finish on this screen.

SAY

We now receive $700,000 instead of $800,000. That one change makes a $100,000 difference.

Second Look shows the difference clearly and flags that our earlier review is out of date. The original review is still there, but we need to look at the new terms before deciding.

That’s what we’re building for fund investors and their advisers: a way to bring the research, the answers and the changing deal together, so people understand what they’re agreeing to.
